BSR INGENIEURE

SRP Albanian Engineering is part of the BSR Ingenieure consisting of the below associated companies with offices spread all over Germany.

COMPANY ORGANISATION

SRP-AE is organized in technical operation department and economical sector. Sub-units of specialists of each department have a team leader. Company staff consists of more than 30 employees, and including the associated companies involves more than 500 people. In addition, the company has access to a wide range of external consulting specialists in all areas of engineering consultancy.

URBAN DEVELOPMENT & ARCHITECTURE

We integrate architecture, tourism, and urban planning to create sustainable environments. Through innovative design, we enhance quality of life and foster urbanization that aligns with global SDG objectives.

TRANSPORT & INFRASTRUCTURE

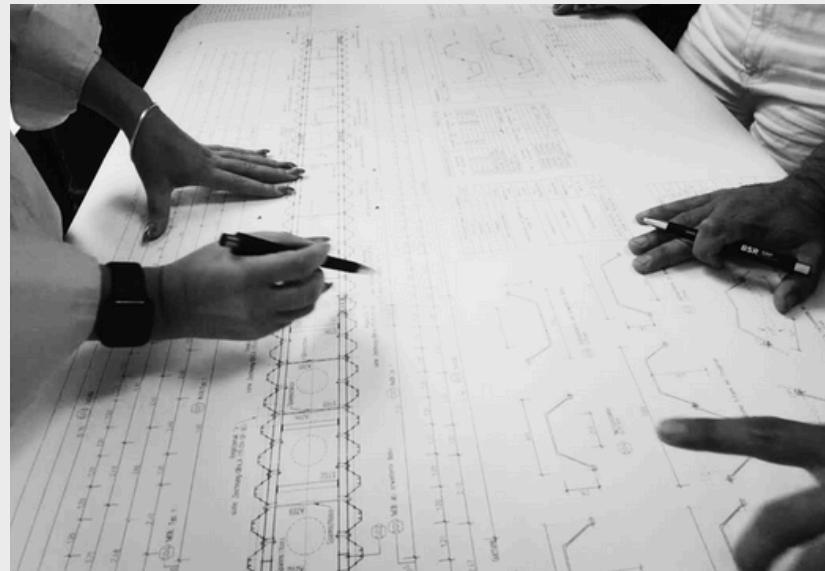

We specialize in sustainable transport infrastructure, delivering resilient roads and bridges. By optimizing traffic networks, improving safety, and minimizing environmental impact, we drive economic growth and support SDG 9 goals.

WATER & ENVIRONMENT

Driving progress on SDGs 6 and 15 through innovative engineering for water security, sanitation, and ecosystem resilience.

WHAT WE DO

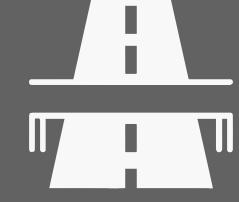

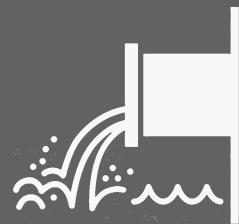

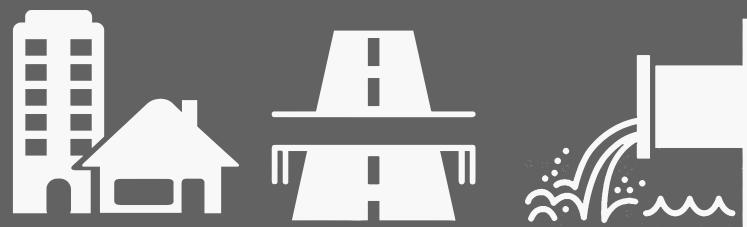

SRP Albanian Engineering provides all services throughout the project cycle of water and environment, transportation, and infrastructure, and urban development projects.

This includes all related surveys and studies, e.g., BIM, GIS, drone surveys, peace and conflict studies, resettlement studies, studies on the impact of climate change, environmental and social impact studies, for the preparation of masterplans, feasibility studies, conceptual and detailed designs, tender documents, assistance during tendering, construction supervision, training, commissioning, and operation.

Special attention is always paid to cost-effectiveness, time efficiency, and sustainability of implemented measures, taking into account the challenges posed by climate change and the need to contribute to climate protection.
